PRESS RELEASE

India's first 3MW solar photovoltaic plant supplied, installed & commissioned in by Photon Energy Systems for Karnataka Power Corporation Ltd. at Itnal village, Belgaum District has now attained the distinction of being the first solar megawatt power plant to generate and feed 4 million units into the grid. It is also the only solar power plant to surpass its annual guaranteed generation target as committed to the customer.

The solar power plant had been set-up for Karnataka Power Corporation Ltd. as demonstration plant in the tail-end of the grid to enhance and strengthen the rural power supply to the areas of Kerur, Itnal & Chikodi towns of Belgaum district.

The 3 megawatt photovoltaic plant has been set-up in a short span of 6 months, constructed to International standards in an area of 17 acres using 13,045 Photon crystalline modules and the best balance of system components from all over the world.

Photon Energy Systems is India's largest and experienced solar solutions company since 15 years, with extensive technical knowledge base and experience in setting up solar power plants. Its projects division is actively involved in providing systems integration and EPC services for setting solar power plants of megawatt scale with both crystalline and thin film modules in India to diverse customers under the numerous schemes of JNNSM and Gujarat Government.
